

NEW PRODUCT from HUNTLEIGH HEALTHCARE

"At last, an affordable, high specification device for use in almost any environment"

The **smartsignsMiniPulse** is a new addition to the expanded range of **smartsigns** patient monitoring systems from the Diagnostic Products Division of Huntleigh Healthcare.

Designed and built in the UK, the ergonomically designed hand held device, displays the patient's saturation level and pulse rate on large high visibility LED displays – *'probably the largest display in its class'*. Fast reliable measurements can be made on all patient groups – Adult, Paediatric and Neonates.

The **MiniPulse** range comprises two models:-

- MP1 Standard model (Alkaline cells)
- MP1R Rechargeable model (NiMH cells and universal charger)

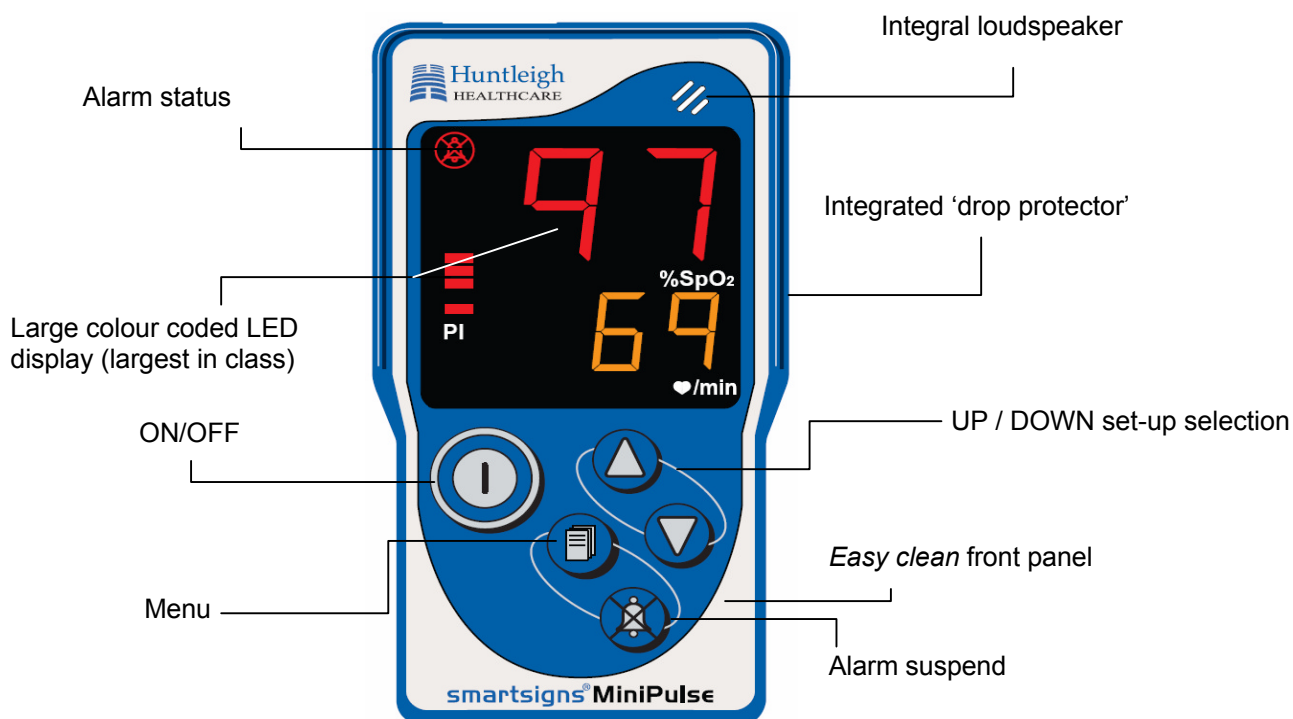

Key Features

- Simple single operation, ergonomically styled, *fits in your hand*.
- Large colour coded LED display – *largest display in its class!*
- Powered by 4 x AA Alkaline cells. Rechargeable versions available.
- 100Hr operation from a single charge, automatic shut off facility conserves battery power.
- Advanced battery management – Tri colour charge identification.
- Full function HI / LOW alarms – SpO2 & Pulse.
- Integrated rubber protector protects the device in harsh environments.
- Adult, Paediatric and Neonatal patient groups.
- Easy clean housing.
- Supplied with a **comprehensive** range of STANDARD accessories:
 - Protective cover
 - IV pole attachment
 - Integral probe storage facility
 - Environmental carry case
 - Desk stand
- Range of affordable sensors available.

A unique *drop protector* has been integrated into the case design which provides users with additional levels of protection when used in difficult, demanding environments.

The device has been designed for the widest possible user group and is ideal for both SPOT or CONTINUOUS long term measurements.

smartsignsMiniPulse
